VISTA LAGO

The ancient part of Malgrate still look like in original middle age period. Houses juxtaposed one each other, dark arcades, narrow streets. The paving of the streets and stairways were completely rebuilt in stone placed in the ancient roman way.

Casa Maggi was built between XV and XVI century by Maggi's family; in the eighteenth century it was owned by the family Agudio. You can find many construction details indicating the past dignity, like the elegant galleries in front and the stone internal stair.
